1. Introduction

The document is intended to explain Ancillary Booking process like adding meal, seat, baggage, bundle products (ex: Seat + Meal) etc at time of booking/Post booking process.

All Ancillaries are charged or free of cost as per the booking rules. API Partners need to flow the process explained in each section.

2. SSR (Special Service Request)

A Special Service Request (SSR) is a message sent directly to suppliers to communicate traveler preferences, special services needed by a traveler, or of a procedural requirement necessary of the carrier. SSRs include information such as meal preference or special assistance required by the traveler.

2.1. SSR Booking Flow Diagram

2.2. SSR Types

- Meal
- Baggage
- Infant
- A la Carte
- FFWD
- Lounge
- Pre Book Sports Equipment
- Good Night Kit

SSR List with Abbreviation

SSR Code	Description
VGML	Veg Meal

2.2.1. SSR Methods

- *GetSSRAvailabilityForBooking*
- *Sell()* → *SellBy:SSR*

2.2.2. GetSSRAvailabilityForBooking

This API method (GetSSRAvailabilityForBooking) is used to get SSR availability and price. This API needs to be called after Journey Sell Request as per Section 2.1

Required Parameters:

- *ContractVersion*
- *Signature*
- *EnableExceptionStackTrace*
- *DepartureDate*
- *DepartureStation*
- *ArrivalStation*
- *CarrierCode*
- *FlightNumber*
- *PassengerNumberList*
- *InventoryControlled*
- *NonInventoryControlled*
- *SeatDependent*
- *NonSeatDependent*
- *CurrencyCode*

Sample Request XML

```
<?xml version="1.0" encoding="UTF-8" ?>
<s:Envelope xmlns:s="http://schemas.xmlsoap.org/soap/envelope/">

```

2.2.3. Sell(SSR)

Sells one or more special service request (SSR) on the current booking. The SSRRequest can either specify a Segment level SSR sell or a leg level SSR sell. In order to sell an SSR the booking in state must include at least one passenger. The SellBy.SSR updates the current state with the data provided in the SellRequest. The sell method updates booking state therefore a commit must be performed to write the changes to the database in Booked PNR.

Note: It requires a booking in state and a commit after the call.

Required Parameters:

- ContractVersion

- *Signature*
- *SellBy.SSR*
- *CarrierCode*
- *FlightNumber*
- *STD*
- *DepartureStation*
- *ArrivalStation*
- *ActionStatusCode*
- *ArrivalStation*
- *DepartureStation*
- *PassengerNumber*
- *SSRCode*
- *CurrencyCode*

Important note to Sell SSR Meal on Corporate booking: -

- *In case of Corporate/SME/Coupon Bookings Complementary Meal can be pushed only on first leg of the journey.*
- *In Case of Via flight, there are possibly having more than one legs but only one segment, provision that passenger can avail complementary meal only on first leg. For Example, a booking as BOM – PAT via DEL then segment should be BOM – PAT and leg should be BOM – DEL and DEL –PAT.*
- *In case of Via flight MEAL can be pushed only on first leg of the journey i.e. BOM – DEL. If Passenger wants meal on second leg as well, then he can buy on flight by cash.*
- *In Case of Connecting flight, there are possibly having more than one segment. For Example, a booking as DEL – GOI Conn BOM then segments should be DEL – BOM and BOM – GOI.*
- *In case of Connecting flight complementary Meal is available only first segments of the journey i.e. DEL – BOM. If Passenger wants meal on second segment as well, then he can buy on flight by cash.*
- *In additional SSR code of **CPTR** will be passed with meal code **CPML** or 4 letter meal code and this new SSR code will also be displayed in corporate booking.*

2.2.3.1. Direct Flight logic for SSR Request

- *In case of Direct flight there is only one segment. For example, a booking as DEL – BOM then all SSR need to be sent to DEL – BOM.*
- *Only one type of Meal and Baggage can be availed in one journey for one passenger.*

SSR Association matrix on Direct Flight

SSR Type	Segment /Flight Leg example for SSR Association	Reservation screen
INFT	As per above mentioned example INFT need to be enter to DEL - BOM	
Meal	As per above mentioned example Meal need to be enter to DEL - BOM	
CPTR	In additional SSR code of CPTR will be passed with meal code CPML or 4 letter meal code and this new SSR code will also be displayed in corporate booking.	
Baggage	As per above mentioned example Baggage need to be enter to DEL - BOM	

Request for Retail Booking

(If a PNR having 2PAX and you want to add INFT, VGML and XBPA for 1Pax and VGML for 2Pax. Below is the Request/Response XMLs for same scenario)

```

2.2.3.2. Via Flight logic for SSR Request

- In Case of Via flight, there are possibly having more than one legs but only one segment, provision that passenger can avail pre book meal only on first leg. For Example, a booking as BOM – PAT via DEL then segment should be BOM – PAT and leg should be BOM – DEL and DEL – PAT.
- In case of Via flight MEAL can be pushed only on first leg of the journey i.e. BOM – DEL. If Passenger wants meal on second leg as well, then he can buy on flight by cash.
- In case of Via flight INFT and Baggage should be enter on entire journey, i.e. BOM – PAT.
- Only one type of Meal and Baggage can be availed in one journey for one passenger.

SSR Association matrix on Via Flight

SSR Type	Segment /Flight Leg example for SSR Association	Reservation screen
INFT	As per above mentioned example INFT need to be enter to entire journey, i.e. BOM – PAT.	
Meal	As per above mentioned example Meal should be enter only on first leg of the journey i.e. BOM – DEL instead of BOM – PAT.	
Baggage	As per above mentioned example Baggage need to be enter to entire journey, i.e. BOM – PAT.	

Request

(If a PNR having 2PAX and you want to add INFT, VGML and XBPA for 1Pax and VGML for 2Pax. Below is the Request/Response XMLs for same scenario.)

```

2.2.3.3. Connecting Flight logic for SSR Request

- In Case of Connecting flight, there are possibly having more than one segment hence every segment need to be entered for SSR(s), For Example, a booking as DEL – GOI Conn BOM then segments should be DEL – BOM and BOM – GOI.
- In case of Connecting flight Meal is available on both segments of the journey i.e. DEL – BOM and BOM - GOI. If Passenger wants meal on both segment then Meal should be added on both segments else it's optional. Meal should be charged segment wise.
- In case of Connecting flight Baggage can be enter only on first segment of the journey i.e. DEL – BOM and then later it can be pushed to entire journey at our end.
- In case of Connecting flight INFT should be enter on both segments, i.e. DEL – BOM and BOM - GOI.
- Only one type of Baggage can be availed in one journey for one passenger.

SSR Association matrix on Connecting Flight

SSR Type	Segment /Flight Leg example for SSR Association	Reservation screen						
INFT	As per above mentioned example INFT should be enter on both segments, i.e. DEL – BOM and BOM - GOI.	Reserved SSRs <table><tr><td></td><td>6E 179 DEL-BOM</td><td>6E5924 BOM-GOI</td></tr><tr><td>▶</td><td>1:INFT</td><td>1:INFT</td></tr></table>		6E 179 DEL-BOM	6E5924 BOM-GOI	▶	1:INFT	1:INFT
	6E 179 DEL-BOM	6E5924 BOM-GOI						
▶	1:INFT	1:INFT						

Meal	As per above mentioned example Meal is available on both segments of the journey i.e. DEL – BOM and BOM - GOI. If Passenger wants meal on both segment then Meal should be added on both segments else it's optional. Meal should be charged segment wise.	Reserved SSRs <table border="1"> <tr> <td></td><td>6E 179 DEL-BOM</td><td>6E5924 BOM-GOI</td></tr> <tr> <td>▶</td><td>1:VGML</td><td>1:VGML</td></tr> </table>		6E 179 DEL-BOM	6E5924 BOM-GOI	▶	1:VGML	1:VGML
	6E 179 DEL-BOM	6E5924 BOM-GOI						
▶	1:VGML	1:VGML						
Baggage	As per above mentioned example Baggage can be enter only on first segment of the journey i.e. DEL – BOM and then later it can be pushed to entire journey at our end.	Reserved SSRs <table border="1"> <tr> <td></td><td>6E 179 DEL-BOM</td><td>6E5924 BOM-GOI</td></tr> <tr> <td>▶</td><td>1:XBPA</td><td></td></tr> </table>		6E 179 DEL-BOM	6E5924 BOM-GOI	▶	1:XBPA	
	6E 179 DEL-BOM	6E5924 BOM-GOI						
▶	1:XBPA

2.2.4. A La Carte Meal Options

Special Instructions: -

1. CPML codes will be replaced with the pre-book codes as per the booking made by corporate/SME/Coupon passenger.
 - a. In case CPML passenger has not made a choice on booking, CPML code will be displayed against corporate/SME/Coupon passenger.
2. CPML will be restricted to book only one meal and not more than one meal.
3. There will be No change for CPML codes for ATR.
4. There will be No change for VGML and NVML codes for ATR.

This document of InterGlobe Aviation Ltd is for restricted circulation. No part of this document may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose, without the written permission of InterGlobe Aviation Ltd.

5. No Changes in limit of SSR at flight level.
6. A-La-Carte “Perishable Items” pre-booking is not allowed, where (From International to India) Sector more than 4 hrs. Current Perishable item codes: -
 - TCSW - Tomato Cucumber Cheese Lettuce Sandwich Combo
 - PTSW - Paneer Tikka Sandwich Combo
 - CTSW - Chicken Tikka Sandwich Combo
 - CJSW - Chicken Jungle Sandwich Combo
 - SCSW - Spinach corn sandwich
 - APWR - Achari paneer tikka wrap
 - MMPA - Murg ka mokul parantha
 - SAMS - Samosa
7. Restrictions based on equipment type need to be defined –
 - 1st Sector -A320 - Allow Pre-book (sector duration restrictions to apply), 2nd Sector - A320 - Allow pre-book (sector duration restrictions to apply).

2.2.5. PreBook Meal:

Item	SSR Code	SSR Availability on Aircraft Type	New/Existing	SSR availability through API for Domestic / International	Remarks
Spinach corn sandwich	SCSW	A320/321	Existing	24Hrs - Dom & International	Not available for short duration flights
Achari paneer tikka wrap	APWR	A320/321	Existing	24Hrs - Domestic & International	Not available for short duration flights

Chicken and Feta salad	CHFS	A320/321	New	24Hrs - Domestic & International	Not available for short duration flights
Chana Kulcha Roll	CNKR	A320/321	New	24Hrs - Domestic & International	Not available for short duration flights
Bhatti paneer salad	BHPS	A320/321	New	24Hrs - Domestic & International	Not available for short duration flights
Makhana combo	MASP	A320/321	Existing	24Hrs - Domestic & International	Not available for short duration flights

Note: -

1. More A-la-carte meals codes are likely to be added in future, please refer to the email from your account manager for the same
2. For Any changes in SSR List please refer to the latest email communication.

2.2.6. PreBook Sport Equipment

<i>Fare Applicability</i>	<i>Pre-book option will be available for all the fare/product class except lite fare</i>
<i>Booking Time</i>	<i>Passenger can book up to 6 hours prior to departure</i>
<i>Sector</i>	<i>Domestic Sector</i>
<i>Aircraft Applicability</i>	<i>Will be available for pre-booking on all the aircraft except ATR</i>
<i>Quantity</i>	<i>Max 3 piece per passenger.</i>
<i>SSR Code</i>	<i>SPEQ</i>

Product Detail:

- The fee will be applied per pax per piece of checked in baggage per Sector (inclusive of GST).
- Sports Equipment like skiing equipment, golf bags, bicycle, surf boards, snow board, water ski, scuba diving equipment, kayak etc. will be valid.
- Currently it will be available for domestic sector.
- Product can be pre-booked 6 hrs prior to departure
- This fee will be applied over and above any excess baggage charges that might be applicable
- The weight of such baggage will be considered part of the permissible baggage allowance and standard excess baggage charges, if applicable, will be levied.
- Product is non - refundable and cannot be cancel in isolation.

2.2.7. Good Night Kit

Product Specs/definition/validation

<i>Fare Applicability</i>	<i>Pre-book option will be available for all the fare/product class.</i>
<i>Booking Time</i>	<i>Passenger can book up to 24 hours prior to departure.</i>
<i>Sector</i>	<i>International Sector</i>
<i>Aircraft Applicability</i>	<i>Will be available for pre-booking on all the aircraft except ATR</i>
<i>Quantity</i>	<i>One passenger can book multiple MHS items. Maximum of one each</i>
<i>SSR Code</i>	<i>BLKT- Blanket NPLW- Neck Pillow EMDK- Eye Mask and Dental Kit</i>

Product Detail:

- The fee will be applied per pax per item per Sector (inclusive of GST).
- Good night Kit will be available for International sector only.
- Product can be pre-booked 24 hrs prior to departure.

- *Product is non - refundable and cannot be cancel in isolation.*

2.2.8. Fast Forward

SSR Code: - FFWD

A nominal fee per person per sector for domestic travel and international travel is applicable if you wish to choose this Service.

Terms and Conditions:

- *Passengers booking IndiGo flights have an option to buy 'FFWD' service which entitles the passengers to priority check-in, priority baggage-drop at a separate FFWD counter at the airport and priority baggage pick-up for travel in certain sectors as stated below. FFWD is not available for group bookings and for certain specific fares.*
- *In case of international travel, FFWD services are not applicable to the immigration process, priority at the aerobridge gate or priority for security checks.*
- *No Charges are payable for infants for FFWD.*
- *The FFWD service can be purchased through IndiGo's website (www.goindigo.in) until two (2) hours prior to domestic departures and up until four (4) hours prior to international departures and at the airport up until the closure of the check-in process for the relevant flight for which the passenger intends to purchase the FFWD service*
- *FFWD services are to be purchased for all passengers travelling under a single PNR and cannot be purchased for only one or some of the passengers traveling under a single PNR.*

FFWD service is available for travel on the following sectors:

- *In case of domestic travel*
 - *Amritsar, Bengaluru, Bhopal, Bhubaneswar, Chandigarh, Chennai, Coimbatore, Goa, Guwahati, Hyderabad, Indore, Jaipur, Kolkata, Kozhikode, Mangalore, Madurai, Mumbai, Nagpur, New Delhi, Port Blair, Pune, Raipur, Rajahmundry, Ranchi, Thiruvananthapuram, Tiruchirappalli, Srinagar, Udaipur, Varanasi, Vijayawada and Visakhapatnam;*
- *In case of international travel*
 - *The following sectors with the point of origin at an Indian airport with international flights – Ahmedabad, Amritsar, Bangalore, Chandigarh, Chennai, Cochin, Hyderabad, Kolkata, Kozhikode, Mumbai, New Delhi, Thiruvananthapuram and Tiruchirappalli, Varanasi, Vijayawada ; and*

Identifier of Bundle Offer in GetAvailability2 Response API Call:-

- For more than 1 bundle multiple <ServiceBundleOffer></ServiceBundleOffer> tags would be available.
- Bundle fares can be identify by tag namely **ServiceBundleSetCode**. Same can be get under
->Journey -> Segment -> Fare -> ServiceBundleSetCode
- Against **ServiceBundleSetCode** as "XXX" you can get **ServiceBundleCode** inside
-> ServiceBundleOfferList -> ServiceBundleOffer -> ServiceBundleCode as "XXX".
- You can see the offer SSR's list under below tags in Response.

For Example:-

->ServiceBundleOfferList -> ServiceBundleOffer ->
ServiceBundlePriceList ->ServiceBundleSSRPriceList -> SSRCode

2.3.3.3 SellServiceBundle

Sells one or more special service request (SSR) on the current booking in the form of Bundle. The SellServiceBundle can be sold at the time of selling the flight or can be sold after the sell flight. SellServiceBundle can be used to upgrade the particular SSRs configured for the up gradation. The sell method updates booking state therefore a commit must be performed to write the changes to the database in Booked PNR.

Note: It requires a booking in state and a commit after the call.

Required Parameters:

- ContractVersion
- Signature
- ServiceBundleCode (You can get the same from GetAvailability API call Response)
- ApplyServiceBundle(It should be Yes)// to sell service bundle
- Journey(You can get the same from GetAvailability API call Response)
- PassengerList (Number of Passengers for which you want to sell Bundle)

Note: - In case of RoundTrip journey you needs to execute SellServiceBundle API call twice (first for onward journey than for Return journey) to Sell Service Bundle.

- Meal and seat bundle can be booked up to 2 Hrs. prior departure
- Meal and seat bundle will not be automatically carried forward in case of rescheduling and has to be purchased again
- Defence fare is subject to change from time to time

3. Seat

An airline seat is a seat on an airliner in which passengers are accommodated for the duration of the journey. Such seats are usually arranged in rows running across the airplane's fuselage. A diagram of such seats in an aircraft is called an aircraft seat map.

3.1 AssignSeat Flow Diagram

Aircraft Types

- A320/ A320 (32s)
- A321 (222)
- A321Neo (232)
- ATR (ATR74/ATR78)

3.2 Methods

- *GetSeatAvailability*
- *Assign Seat*

3.2.1 GetSeatAvailability

The booking state must be populated with booking data, the seat request must refer to flights in state. If not the request will return no seat in the SeatAvailabilityResponse or in some cases an exception. GetSeatAvailability usage depends upon how you intend to assign seats. The SeatAssignmentMode field determines how the availability request will be handled.

Note: It requires a booking in state and a commit after the call.

Required Parameters:

- ContractVersion
- EnableExceptionStackTrace
- Signature
- STD
- DepartureStation
- ArrivalStation
- IncludeSeatFees
- SeatAssignmentMode
- FlightNumber
- CarrierCode
- PassengerIDs
- CollectedCurrencyCode

Request

```
<STD>2018-11-10T00:00:00</STD>
<DepartureStation>HYD</DepartureStation>
<ArrivalStation>NAG</ArrivalStation>
<IncludeSeatFees>true</IncludeSeatFees>
<SeatAssignmentMode>PreSeatAssignment</SeatAssignmentMode>
<FlightNumber> 7103</FlightNumber> ----- Should
    be 4 character length
<CarrierCode>6E</CarrierCode>
<OpSuffix i:nil="true" />
<CompressProperties>false</CompressProperties>
<EnforceSeatGroupRestrictions>false</EnforceSeatGroupRestrictions>
<PassengerIDs
    xmlns:a="http://schemas.microsoft.com/2003/10/Serialization/Arrays">
  <a:long>0</a:long>
</PassengerIDs>
<CollectedCurrencyCode>INR</CollectedCurrencyCode>
```

3.2.2 AssignSeat

When assigning seats using the AssignSeats methods for a booking, the booking must exist in booking state or unpredictable errors occur. The values used for the SeatAssignmentMode field are determined by when the seat assignments are made. For a booking, use the value "PreSeatAssignment", if a booking is in state the "AutoDetermine" value may be used. Do not provide a record locator in the request when using PreSeatAssignment mode when calling AssignSeats for a booking that is in booking state. Commit must be used to save the seat assignments for the stateful assignment.

Required Parameters:-

- Signature
- Contractversion
- EnableExceptionStackTrace (default False)
- SeatAssignmentMode
- CarrierCode
- FlightNumber
- STD
- CollectedCurrencyCode
- DepartureStation
- ArrivalStation
- PassengerID
- UnitDesignator(SeatNumber)

Request

```
<SeatAssignmentMode> PreSeatAssignment </SeatAssignmentMode>
<IgnoreSeatSSRs>true</IgnoreSeatSSRs>
<SegmentSeatRequests>
<SegmentSeatRequest>
<FlightDesignator
  xmlns:a="http://schemas.navitaire.com/WebServices/DataContracts/Common">
<a:CarrierCode>6E</a:CarrierCode>
<a:FlightNumber> 7103</a:FlightNumber>
<a:OpSuffix i:nil="true" />
```

```

</FlightDesignator>
<STD>2018-11-10T00:00:00</STD>
<DepartureStation>HYD</DepartureStation>

To get latest Seat Fee charge, kindly refer IndiGo's website or you can get the fee amount from 'GetSeatAvailability response' as well.

3.3 A320

➤ INSTRUCTIONS TO ASSIGN SEAT THROUGH API IN THE BOOKING FLOW

- You need to execute the **GetSeatAvailability** request before **AssignSeats** to get the available seats which can be selected.
- You need to display Seat map on your portal with seats location and their designator as showing on our website.
- T&C please refer <http://book.goindigo.in>
- Passenger can select only the seats which are available. Same can be identified from the tag namely
- '**SeatAvailability**' having value as '**Open**' with their respective '**SeatDesignator**' in **GetSeatAvailability Response**.
- Below is the screenshot of sample code for your reference:

```
<SeatInfo>
<Assignable>true</Assignable>
<CabotageLevel>0</CabotageLevel>
<CarAvailableUnits>0</CarAvailableUnits>
<CompartmentDesignator>Y</CompartmentDesignator>
<SeatSet>9</SeatSet>
<CriterionWeight>0</CriterionWeight>
<SeatSetAvailableUnits>0</SeatSetAvailableUnits>
<SSRSeatMapCode></SSRSeatMapCode>
<SeatAngle>0</SeatAngle>
<SeatAvailability>Open</SeatAvailability>
<SeatDesignator>11C</SeatDesignator>
<SeatType>NS</SeatType>
<X>3</X>
<Y>21</Y>
```

- If passenger selects any premium seat, then charges will be applied on the same and will be reflected in **AssignSeats** response. You can identify the seat charges as well as Seat Group from the tag namely '**SeatGroup**' in **GetSeatAvailability Response**.

➤ **SeatMap**

➤ **Description**

- Row – 12 and 13 are Emergency Exit Seats.
- Seat layout structure is same for all IndiGo A320 AirCraft. In IndiGo AirCraft, Total no of seats are 180 and you can get the rows and columns from shared document.
 - No of Rows – 1 to 30
 - No of Columns – A to F
- For Connecting flight or Round Trip, seat will be selected segment wise.
 - Example – if passenger selects the connecting flight (DEL – BOM – BLR), then he needs to select the seat for both segment DEL – BOM and BOM – BLR.

Note - If passenger selects the premium seat for connecting or Round Trip, then charges will be applied segment wise.

Kindly refer IndiGo seat map for Seat Layout – available on the website <https://book.goindigo.in>.

- Row – 12 and 13 are Emergency Exit Seats.
- Rows 1, 12 and 13 are with Extra Leg Room.
- Below mention seats are blocked for operational reasons, please do not book through API Seat.

Seat 1A, 28 (A, B, E, F), 29 (A, B, E, F), Row 30

Message:

 **CAUTION**

You are about to select seats on Emergency Exit. To ensure safety of our customers, seating on emergency exit rows is subject to below confirmation:

1. I am able bodied and aged above 15 years.
2. I am not travelling with infant or children below the age of 15 years or with anyone who requires special assistance in case of an emergency evacuation.
3. I am able to read (in Hindi or English) and understand instructions related to emergency evacuation provided by IndiGo in printed, handwritten or graphic form or able to understand oral crew commands (in Hindi or English)
4. I or persons travelling with me do not require safety assistant for emergency evacuation.
5. I do not have any permanent or temporary impairment like sensory impairment, strength or mobility limitation, intellectual impairment, or travelling with service dogs
6. I do not require to use Portable Oxygen Concentrators on board the aircraft.
7. I am not pregnant or travelling with someone who is pregnant.
8. I do not require extension seat belt.

☐ I confirm and agree to all of the above and also understand that IndiGo reserves all rights to change my/our seat(s) Keeping in mind the overall safety. Yes I want to proceed with seat selection on emergency exit row.
