B2B Flight Booking Portal

Date: 05/08/2025

Open Till: 23/08/2025

Proposal: B2B Flight Booking Platform

Overview

This document outlines the scope, features, and deliverables of the **B2B Flight Booking Platform** designed for travel agencies and corporate clients. The system empowers agents to search, compare, and book flights in real time, manage customer bookings, and streamline operations with role-based access, credit balance handling, and detailed reporting. The platform is secure, scalable, and optimized for high-volume booking environments.

Scope of Work

Agent Portal

The Agent Portal provides a advanced interface where travel agents can

- Search and book flights in real time (One-way, Round-trip, multi-city).
- View and manage customer bookings
- Apply filters: airline, stops, fare type, departure time, etc.
- Download tickets, invoices, and credit statements
- Check credit balance and transaction logs
- Receive notifications via email/WhatsApp/SMS.

Admin Dashboard

The Admin Dashboard provides tools to manage and monitor the platform

- Add/edit agents and manage roles/permissions
- Manage markups, fare rules, and credit limits
- View and track booking and transaction logs
- Control provider integrations and manage API credentials

- Generate and export detailed reports
- Approve/deny bookings for specific fares (if enabled)

Flight Booking Module

This module integrates with **three provider** (GDS or aggregator) and includes

- Real-time search with availability and fare rules
- Booking workflow with live fare validation
- PNR generation and ticket issuance
- Support for baggage, SSR, fare breakdowns, cancellation/refund policy display
- Handling of multi-airline and multi-segment itineraries
- Post-booking notifications and downloadable invoices

Payment & Credit Handling

The system supports both credit and direct payment models

- Wallet management for agents with top-up and balance tracking
- Booking summary and confirmation flow
- Admin view of all payments and wallet activities

Authentication & Security

The platform includes strong security measures

- JWT-based secure sessions
- Encrypted password storage using bcrypt
- Role-based access (Admin, Agent, Accountant, etc.)
- Optional OTP login for agents

Notifications & Alerts

Custom alerts for key events

- Booking confirmation, cancellation, and payment success
- Admin alerts for booking failures or API issues
- Customizable message templates per client/agency

Reports & Analytics

Comprehensive reporting features

- Daily/Monthly booking and transaction reports
- Airline-wise, route-wise, and agent-wise analytics
- Exportable reports (CSV, PDF)
- Filters for airline, date range, fare type, etc.

Project Timeline – B2B Flight Booking Platform

- Phase 1: Project Kick-off (3 days) - Project planning, team allocation, requirement finalization, documentation setup
- Phase 2: UI/UX Design (2 weeks) - Complete UI design (Figma/Zeplin), design walkthrough.
- Phase 3: Frontend Development (2 weeks) - Functional UI for all modules. Only start once we get client approval for UI/UX.
- Phase 4: Backend & API Configurations (1 weeks) - APIs for authentication, bookings, agent management, credit handling
- Phase 5: GDS/Provider Integration (2 weeks) - Integrate 1 flight provider (GDS or aggregator), fare search, booking, PNR, ticketing

- Phase 6: Notifications Setup (3 days) - Email, SMS, WhatsApp notifications for booking events and alerts
- Phase 7: QA & Testing (2 weeks) - Functional, integration, security, cross-device testing
- Phase 8: Deployment & Handover (3 days) - Final deployment, server setup.

Total Estimated Duration: 3 - 4 Months.

Commercials

In consideration of the services provided by **Ecogo Software Solutions**, the client agrees to the pricing structure outlined below

#	Item	Qty	Rate	Tax	Amount
1	B2B Flight Booking Portal A professional portal for travel agents to search, book, and manage flights with real-time pricing. Includes three provider integration, agent login, markup control, wallet system, and booking history. Included Providers (TripJack, Akbar, Alhind)	1	1,860,000.00	0%	1,860,000.00
					Sub Total Rs1,860,000.00
					Discount -Rs410,000.00
					Total Rs1,450,000.00

Payment Terms

The proposed amount is exclusive of taxes. An additional 18% tax will be applicable.

- **40%** on Project Confirmation
- **35%** on UI/UX Design Approval
- **15%** upon Completion of Frontend Development
- **10%** on Final Deployment & Handover

Exclusions

- Any **third-party API charges**, SMS/email/WhatsApp service charges, or licensing fees are not included.
- **Server infrastructure and cloud hosting** are excluded and must be arranged or billed separately.
- Any **data migration** or external system integration (ERP, CRM) is excluded unless specified.
- **GST/taxes**, as applicable, will be charged in addition to the proposal amount.

Terms & Conditions

- Flight booking includes integration with 3 providers (TripJack, Akbar, Alhind). Additional providers will be charged separately.
- Any **change requests or additional features** outside this scope will be estimated and charged separately.
- The client must provide timely access, content, and credentials for API integrations and testing.
- Post 3-month support is included, an **AMC (Annual Maintenance Contract)** can be optionally signed for extended support. AMC charges will be 15% of the total invoice amount before tax.
- Delays due to **dependency on third parties** (e.g., provider credentials, payment gateway approval) are not our responsibility.
- Project timeline and delivery depend on timely approvals, feedback, and milestone payments

Warranty Information

A **3-month post-deployment warranty** is provided, covering:

Included:

- Bug fixes within the delivered feature set
- Support for system logic or functional errors
- Minor performance enhancements

Excluded:

- New feature implementations
- Downtime or issues from client server changes
- Failures due to provider API modifications

Support Mode:

- Email & ticket-based support system
- SLA: 24–48 hour response window
