| ● Rest API integration - Dio | ● Material Ui | ● SQL Lite |
| ● Jetpack compose and XML Ui Integration | ● Kotlin | ● MVVM |
| ● Version Control – Git | | |

PROJECTS

Home To | [Flutter](#)

ZOONDIA

- Developed a comprehensive e-commerce application that empowers users to engage as both sellers and buyers
- Implemented features allowing sellers to set custom prices for their products and enabling users to suggest preferred delivery times.

- Integrated Firebase Messaging for real-time notifications and updates, enhancing user engagement and transaction efficiency.

Pitch | [Flutter](#)

[ZOONDIA](#)

- Developed a multi-user application similar to LinkedIn using Flutter, catering to four user types: Job Seekers, HR Professionals, Brands, and Businesses.
- Implemented real-time chat functionality, allowing seamless communication between users.
- Integrated document upload capabilities to enhance user engagement and facilitate sharing of resumes and portfolios.
- Developed live streaming features for audio and video to support virtual networking and events.
- Utilized Dart and Flutter framework to ensure high performance and responsiveness of the app.

Cric-Coach | [Flutter](#)

[ZOONDIA](#)

- Developed a comprehensive Flutter-based cricket coaching app that enhances player-coach interaction through features like video uploads, real-time chat, and performance analysis.
- Developed a chat interface enabling seamless communication between coaches and players.
- Implemented a feature allowing users to upload cricket practice videos for analysis.

Kruuz | [Kotlin – Java](#)

[ZOONDIA](#)

- Kruuz is an eco-friendly platform facilitating transportation in urban areas, college campuses, and other facilities using modern electric scooters.
- It offers convenient point-to-point travel solutions for users seeking sustainable mobility options.
- Allow users to book both private and public scooters for their transportation needs.
- Implemented a map feature displaying scooter markers, designated parking areas represented by polygons, and cluster view for scooter markers to enhance user navigation, accessibility and stripe payment SDK.

Laennec-Ai | [Flutter](#)

[LAENNEC AI](#)

- Laennec AI is an innovative mobile application that leverages your smartphone's microphone to record and playback heart and lung sounds.
- It is not a clinical diagnostic tool but serves as an educational resource to enhance understanding of body sounds
- Developed an Ai influencer interface enabling seamless communication between influencer and users.

EDUCATION

- **Ponjesly College of Engineering**
[B- E \(Computer science and Engineering\)](#)
 Aug 2016 - Dec 2020
